WORK EXPERIENCE

QualitySoft Group (Backend Developer)

Python and Django

I used Python and the Django framework to develop the backend of a clinical asset management software. I implemented secure authentication, REST API services and documented the application using technologies such as Swagger.

Santa Marta, Colombia

March 8, 2024

QualitySoft Group (Frontend Developer)

Ionic Canvas Application

I led the development of an application to manage the design of oil wells using the Ionic framework and technologies such as TypeScript. I implemented drag and drop functionalities to allow users to design well structures in an interactive way.

Santa Marta, Colombia

November 11, 2023 - March 8, 2024

QualitySoft Group (Test Engineer)

Java and Spring Project

I participated in an online store project based on Spring Boot and Gradle. I focused on testing using technologies such as Mock to integrate the PayU payment gateway, allowing payment and return operations in an efficient way.

Santa Marta, Colombia

February 24, 2023 - November 11, 2023

QualitySoft Group (Full Stack Developer)

Book Application

I led the development of a book application, using Nest.js on the backend to enable user registration across various platforms. I implemented advanced logics in the frontend to manage the visualization of the content, controlling the access to the different parts of the book and facilitating the payment process through PayU.

July 24, 2022 - February 24, 2023

QualitySoft Group (Angular Developer)

Application Support and Maintenance

In this role, I provided support and maintenance to applications with Java and Angular.js according to user needs. I participated in functional meetings to make the release of requirements and ensure customer satisfaction.

Santa Marta, Colombia

November 2021 - February 2022

QualitySoft Group (Frontend Developer)

Book Loan Management Web Application

I was responsible for frontend development on a project that automated the book lending process. The web application allowed users to log in or register, and facilitated the rental of books by

digitally signing a loan agreement. I used Angular to create an interactive and easy to use interface.

QualitySoft Group (Full Stack Developer)

Santa Marta, Colombia

Interactive Mobile Application Project

July 21, 2020 - July 1, 2021

I participated as a full stack developer in a project that involved the use of technologies such as Ionic, Node.js and MongoDB. I developed an interactive application that allowed users to register, create posts with advanced options such as location and image upload, and manage their account information with integrated CRUD functionalities.

QualitySoft Group (Mobile Developer Kotlin)

Santa Marta, Colombia

User Management Application

January 18, 2020 - July 20, 2020

In this project, I took on the role of a mobile developer to create an application that facilitated user registration and management using Firebase. The app ensured secure access to dashboard content for registered users only and provided an intuitive interface for account management.
